NMZ027>029 Guadalupe Mountains Of Eddy County - Eddy County Plains - Lea 25 0100MST 0 0 0 Heavy Snow 26 0100MST The last in the series of storms systems in one week passed through southeast New Mexico on Christmas Day, dumping 6+ inches of snow over most of Eddy County and 4+ inches over much of Lea County. This storm affected the area longer than the previous two events with snow falling in some part of southeast New Mexico for 24 hours. In northwestern Eddy County, Hope finished the three events with an incredible 29 inches of snow. TEXAS West TXZ057 Van Horn/Guadalupe Mountains Area 22 1600MST 3 0200MST The second in the series of storm systems dumped heavy snow two days after storm #1. This system was characterized by very strong lift in a deformation zone northeast of the center of upper level low pressure. The actual passage of the upper low was relatively quiet with only some flurries in the mountains as the lift stayed ahead of the upper low to the northeast. At Pine Springs, Guadalupe Mountains National Park rangers reported accumulations of 6 inches from the storm. Highway Department workers were able to keep U.S. Highway 62/180 open through the event. TEXAS Central TXZ049-053-054- 098-099-113-114- 127-128 Fisher-Mitchell-Nolan-Haskell-Throckmorton-Jones-Shackelford-Taylor-Callahan 26 0100CST 0 0 Winter Storm
